#### A tensor can be of several types:

- torch.float16, torch.float32, torch.float64,
- torch.uint8,
- torch.int8, torch.int16, torch.int32, torch.int64

and can be located either in the CPU's or in a GPU's memory.

Operations with tensors stored in a certain device's memory are done by that device. We will come back to that later.

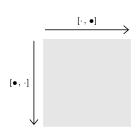

```
>>> x = torch.zeros(1, 3)
>>> x.dtype, x.device
(torch.float32, device(type='cpu'))
>>> x = x.long()
>>> x.dtype, x.device
(torch.int64, device(type='cpu'))
>>> x = x.to('cuda')
>>> x.dtype, x.device
(torch.int64, device(type='cuda', index=0))
```

#### 2 / 15

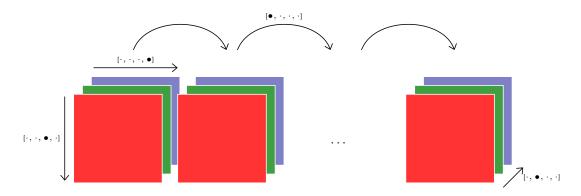

### 2d tensor (e.g. grayscale image)

### 3d tensor (e.g. rgb image)

### 4d tensor (e.g. sequence of rgb images)

François Fleuret

Here are some examples from the vast library of tensor operations:

#### Creation

```
• torch.empty(*size, ...)
• torch.zeros(*size, ...)
• torch.full(size, value, ...)
• torch.tensor(sequence, ...)
• torch.eye(n, ...)
```

#### • torch.from\_numpy(ndarray)

#### Indexing, Slicing, Joining, Mutating

```
• torch.Tensor.view(*size)
```

- torch.cat(inputs, dimension=0)
- torch.chunk(tensor, chunks, dim=0)[source]
- torch.split(tensor, split\_size, dim=0)[source]
- torch.index\_select(input, dim, index, out=None)
- torch.t(input, out=None)
- torch.transpose(input, dim0, dim1, out=None)

#### **Filling**

- Tensor.fill\_(value)
- torch.bernoulli\_(proba)
- torch.normal\_([mu, [std]])

François Fleuret

4 / 15

#### Pointwise math

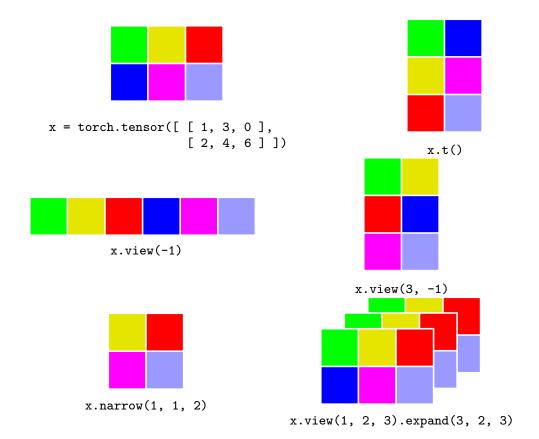

- torch.abs(input, out=None)
- torch.add()
- torch.cos(input, out=None)
- torch.sigmoid(input, out=None)
- (+ many operators)

#### Math reduction

- torch.dist(input, other, p=2, out=None)
- torch.mean()
- torch.norm()
- torch.std()
- torch.sum()

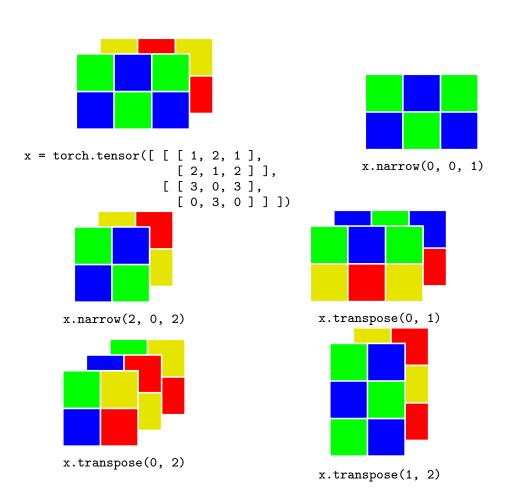

#### **BLAS** and **LAPACK** Operations

- torch.eig(a, eigenvectors=False, out=None)
- torch.gels(B, A, out=None)
- torch.inverse(input, out=None)
- torch.mm(mat1, mat2, out=None)
- torch.mv(mat, vec, out=None)

#### PyTorch offers simple interfaces to standard image data-bases.

```
import torch, torchvision
cifar = torchvision.datasets.CIFAR10('./cifar10/', train = True, download = True)
x = torch.from_numpy(cifar.train_data).transpose(1, 3).transpose(2, 3).float()
x = x / 255
print(x.type(), x.size(), x.min().item(), x.max().item())
```

#### prints

Files already downloaded and verified torch.FloatTensor torch.Size([50000, 3, 32, 32]) 0.0 1.0

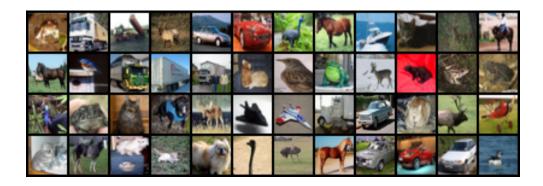

François Fleuret

8 / 15

```
# Narrows to the first images, converts to float
x = x.narrow(0, 0, 48).float()
```

# Saves these samples as a single image
torchvision.utils.save\_image(x, 'cifar-4x12.png', nrow = 12)

# Switches the row and column indexes
x.transpose\_(2, 3)
torchvision.utils.save\_image(x, 'cifar-4x12-rotated.png', nrow = 12)

François Fleuret

EE-559 – Deep learning / 1.5. High dimension tensors

10 / 15

# Kills the green and blue channels
x.narrow(1, 1, 2).fill\_(0)
torchvision.utils.save\_image(x, 'cifar-4x12-rotated-and-red.png', nrow = 12)

François Fleuret

## **Broadcasting**

François Fleuret

EE-559 – Deep learning / 1.5. High dimension tensors

12 / 15

**Broadcasting** automagically expands dimensions by replicating coefficients, when it is necessary to perform operations that are "intuitively reasonable".

#### For instance:

```
>>> x = torch.empty(100, 4).normal_(2)
>>> x.mean(0)
tensor([2.0476, 2.0133, 1.9109, 1.8588])
>>> x -= x.mean(0) # This should not work!
>>> x.mean(0)
tensor([-4.0531e-08, -4.4703e-07, -1.3471e-07, 3.5763e-09])
```

Precisely, broadcasting proceeds as follows:

- 1. If one of the tensors has fewer dimensions than the other, it is reshaped by adding as many dimensions of size 1 as necessary in the front; then
- 2. for every dimension mismatch, if one of the two tensors is of size one, it is expanded along this axis by replicating coefficients.

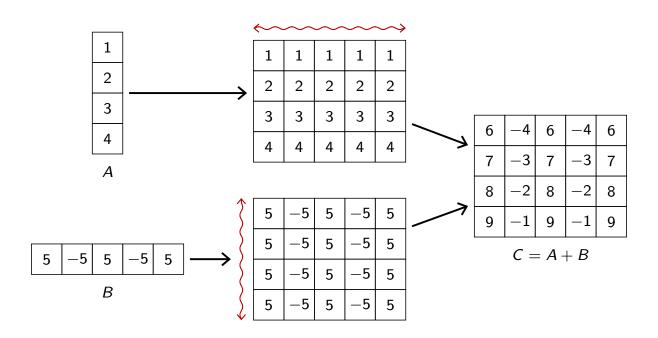

If there is a tensor size mismatch for one of the dimension and neither of them is one, the operation fails.

François Fleuret

EE-559 – Deep learning / 1.5. High dimension tensors

14 / 15

```
A = torch.tensor([[1.], [2.], [3.], [4.]])
B = torch.tensor([[5., -5., 5., -5., 5.]])
C = A + B
```

**Broadcasted**
